1.0 Distribution

This Capability List shall be maintained under revision control by the Quality Manager. Controlled copies shall be maintained by the personnel or department identified below.

Copy	Assigned
Master	Quality Manager
1	FAA
Electronic	Repair Station Intranet

2.0 Record of Revision

When revisions to the Capability List are required, the record of revision page must be updated to reflect the current status of the manual.

REV	DATE	REASON	CHANGE
Org	3/6/2020	New Format	Entire Document
1	8/21/2020	Manual Review	Section 4,5,6,7
2	8/20/2021	Manual Review	Section 7.0c, changed 24 months to 36, 8, revised added sections 9, 10
3	9/14/2022	Manual Review	Section 6.0, clarified the revision process, 10.0 added General Manager
4	6/1/2023	Manual Review	Added part numbers

3.0 List of Effective Pages

The List of Effective pages will be signed and dated by the Quality Manager. Upon acceptance by the FAA, a signed copy will be returned and kept of file.

4.0 Introduction

This document will be located with the individual or location assigned. This issue and all other revisions to this document will become effective upon approval of ACI and acceptance by the FAA.

The Capability List has been prepared in accordance with the current Federal Aviation Regulations (FAR's) and the policies

5.0 Control of Capability List

Paper Format

There shall be one copy of this manual (master copy) in paper format held at this repair station and shall be assigned to the Quality Manager.

This copy will be maintained current at all times. The technical library shall hold the master copy.

Alabama Flight Standards District Office shall be assigned a copy of this manual.

Electronic Format

An electronic copy based on the current master copy shall be posted on the repair station intranet scan system. This shall be accessible to all staff of this repair station that may need to reference the manual during the course of performing their assigned task.

To prevent access to information that is not maintained current, any employee who prints the manual or pages from the electronic copy on the intranet scan system, the printout will bear watermark containing the following statement:

"Uncontrolled If Printed Print By: [name of staff login to the scan system]."

The Quality Manager shall be responsible for the administration and issue of the revisions for this Capability List.

6.0 Revision to the Capability List

All additions and deletions to the Capability List Manual shall be approved by the Quality Manager by performing a self-evaluation per section 12 of the DRSQM. A temporary revision may be submitted quarterly or as requested by the FAA FSDO, with a complete revision submitted annually. If Alabama FSDO has not declined acceptance via email within 5 business days, ACI will consider the temporary revision as accepted. A copy of the temporary revision shall be inserted in the front of the FAA Capability List Manual.

A completed self-evaluation is kept on file for each article that is added to the Capability List Manual.

The Capability List Manual is controlled document. Once a revision has been completed and approved by the Quality Manager, it will be submitted to the FAA FSDO within 5 business days of the approved revision date.

7.0 Self-Evaluation

A self-evaluation shall be completed on articles that are currently not on the Capability List. This evaluation shall be recorded on a Self-Evaluation Form and routed to the FAA for their review and acceptance. ACI shall maintain a copy of the completed self-evaluation form as long as the part number is continuously supported by ACI. When the following occurs, a review shall be conducted to ensure that the requirements are being met for the article received:

- a) When the repair station made major changes to its facility or equipment
- b) When major process change by the OEM
- c) When an article is listed on the accepted capability list was last worked 36 months or longer from the date of the current input.

All reviews shall be recorded on a Self-Evaluation form and kept on file.

8.0 Self-Evaluation Form

The purpose of this form is to record the results of the capability evaluation. This record is maintained on file as long as the part number is supported by ACI.

The Self-Evaluation form is filed in the Repair Station Forms Manual

9.0 Qualified Evaluators

Capability evaluation may be performed by a person meeting the following qualifications:

- a. Understands the requirement of Part 145
- b. Has working knowledge of maintenance process(es) employed by ACI
- c. Reads, understands and capable of extracting relevant information from technical data provided

10.0 Qualified to Approve Self-Evaluation Form

The General Manager or Quality Manager shall approve the self-evaluation record prior to adding the part number to the capability list.
